## City of Oregon City

### Building Division

### POLICY

## RAIN DRAIN TERMINATIONS

**Division Responsibility:** Building

**Action Required:** Inspect, verify and approve

**Desired Outcome:** Inspect to verify compliance to city standards and specifications and to ensure all work is done in a workmanship like manner.

#### **PROCEDURE:**

1. All rain drain piping that runs under city sidewalks and terminates through public street curbs must be run with no larger than 3 inch diameter approved drain piping.
2. Concrete poured for public sidewalks over drain piping must be of adequate thickness to prevent cracking of the concrete around the piping.
3. Drain piping must be connected to existing curb penetrations whenever possible.
4. Any curb cuts for new penetrations must be a minimum of 24 inches in length and blend in with existing curbing.
