| Description of Physical and Landscape Features: | | | |
| Sitting behind a picket fence, this house exhibits a number of American Foursquare characteristics with its full two story elevation and square plan. The pyramidal roof has large overhangs and a small shed dormer to the street side. The upper story is covered with alternating wide and narrow rows of wood shingles, while the lower story is sided with round edge drop siding. A shed roof front porch with tapered square columns covers the front entry. The wood shingling pattern picks up again to create the skirting around the porch. Windows are 1/1 wood double-hung. | | | |
