Description of Physical and Landscape Features:			
This single story Modernist church has a complex plan. It sits on a concrete foundation and is clad in brick, with lap siding in the north gable end. The gabled roof is covered with composition shingling. The windows are primarily multi-pane fixed and 4-pane casement, with a bay window facing west off the north gable end. Some rear walls have deteriorating parging. There is a narrow spire atop one of the ridges and dormers with low pitched roofs.			
Statement of Significance:			
The St. Paul's Episcopal Church congregation was established in 1851.
