

Advancement of Public Works

Presidential Award for Chapter Excellence Oregon Chapter Submission 2011

Historical Preservation Project of the Year – Less than \$5 million

McLoughlin Promenade

Agency: City of Oregon City

Consultant: Wallis Engineering

Contractor: Pioneer Waterproofing, Inc.

In 1851, before Oregon was even a state, Dr. John McLoughlin, the father of Oregon of the Hudson's Bay Fur Trading Company, dedicated 7.8 acres of land for a park to Oregon City. In 1938, Franklin D. Roosevelt funded improvements to the park through the Works Progress Administration program. In 2009, the American Recovery Reinvestment Act funded the restoration of the park. Great care was taken to match construction material and techniques used in 1938 even down to matching the color of the mortar and concrete used. In addition, custom containment facilities were constructed for safety as the work was done at and over the edge of an 80-foot cliff with public right-of-way directly below.

Honorable Mentions

Cascade Well #5

Agency: Rockwood Water PUD

Consultant: Murray, Smith & Associates, Inc., GSI Water Solutions Inc.

Contractor: Boart Longyear, Ward Henshaw
